Lewco NFSS 10 Sewing Thread High Temperature Sewing Thread

Lewco NFSS 10 high temperature sewing thread is a fiberglass and 10 strands of 0.002", 304 SS wire core wrapped with a nylon covering. This thread was developed and tested for service temperatures to 1500 degrees F. This product has the best retained seam strength of any product currently on the market after an extended service temperature of 1200 degrees F and above temperatures. Lewco NFSS 10 sewing thread was manufactured and tested to sew in both Rotary Bobbin and Shuttle type sewing machines.
